## ***For Immediate Release***

Calgary, Alberta: February 1, 2017

**Hazloc Heaters™**, a leading manufacturer of industrial heating products for hazardous and severe-duty locations, is pleased to announce the introduction of the **EXCaliber Series** of explosion-proof air-sensing thermostats that are **CE Marked and certified to meet ATEX, IECEx & EAC Ex requirements in Gas and Dust atmospheres.**

The **EXCaliber Series** of thermostats are available in a Bi-metal (**BTX**) and Electronic (**XET**) type configuration designed for use with heating or cooling equipment located in **Zone 1 & 2 or Zone 21 & 22** hazardous locations. Both models are extremely rugged and offer IP ratings and come with an easily adjustable and lockable dial.

**Hazloc Heaters™** General Manager, Darren Ochosky, stated, **“The EXCaliber thermostats are unique in their design features. Furthermore, the innovative XET electronic thermostat is the first of its kind in the world.** This reinforces our dedication to helping our customers grow and prosper by providing leading edge industrial heating and cooling related products, technical expertise, and outstanding service.” **Hazloc Heaters™** is also committed to a high standard of quality and on-time delivery performance.

**Hazloc Heaters™** is based in Calgary, AB, Canada. For further information, please contact Darren Ochosky at 1-866-701-4328 or 403-730-2488 or visit [www.HazlocHeaters.com](http://www.HazlocHeaters.com).
